## ARCHITECH SIGN SYSTEMS

Designed and produced in the UK, Architech is an Extruded Curved Face Insert system featuring a Clic-Loc mounting mechanism. Providing a visible and fixing-free curved insert, Architech can be used as a way finding or informative media display system both internally and externally. The Architech range comprises eight extrusion widths and over 120 different caps, combining to create eight different methods of mounting and fixing.

The Architech system can accommodate a wide variety of thin flexible media substrates ranging from High Impact Polystyrene (HIP) to regular printer/copier paper; allowing for simple changing of media for the sign supplier or end user.

As an alternative to a Self Build Sign System, these units can be supplied fully assembled but partially finished, powder coated to one of 107 stock RAL colours or as fully finished units complete with your graphics applied.

All components are available on a same working day despatch.

Please note that all prices are supplied in component form only, carriage charges and VAT have not been included.

Ashby Trade Sign Supplies is a manufacturer, designer and distributor of signage systems. Open longer for our customers convenience, our products can be purchased either as components, partly finished or fully finished systems.

### EXTRUDED COMPONENTS

Eight different profile widths (comprising 18 different extrusions, one post section) and a support section make up the extruded components of the Architech range.

### WALL MOUNTED COMPONENTS

Available with black plastic or silver anodised end caps to match your chosen profile width (for Directory systems see page 18).

Available using all extrusion widths.

### PROJECTING COMPONENTS

Comprising 40 caps in total, the projecting components offer a mixture of wide or slim assemblies in either a portrait or landscape orientation.

Available using 100/150/215/300mm Architech extrusion.

### SUSPENDED COMPONENTS

Available using extrusion widths up to 300mm, the suspended range allows for several units to be suspended above one another to create a multi level signage system.

Available using 50/100/150/215/300mm Architech extrusion.

### DESKTOP COMPONENTS

Compatible with extrusion width of up to 215mm in landscape or portrait orientation, desktop components are available with high or low viewing level.

Available using 50/100/150/215mm Architech extrusion.

### STATIC TOTEM COMPONENTS

Single or double sided, fixed or freestanding Totem display signage with slim or wide profile. Available in lengths of up to 2.15 metres.

Available using 300/420/500/600mm Architech extrusion.

### MOBILE TOTEM COMPONENTS

A 5mm rolled steel baseplate accommodates castors that allow for a free moving mobile display.

Available using 420/500/600mm Architech extrusion.

### POST MOUNTED COMPONENTS

Compatible with profile widths of between 300mm and 600mm, laser cut steel baseplates accommodate the round 60mm extrusion.

Available using all extrusion widths.

### FIXINGS

A comprehensive list of all non-specific system components are used throughout the range

All Items sold are subject to the Standard Trading Terms of **Ashby Trade Sign Supplies Ltd.**  
Copy on request or viewable at [www.ashbytrade.net](http://www.ashbytrade.net)

Prices are correct at the time of printing and may be subject to change.

\*Waterproof media must be used with external signage\*

## CURVED ALUMINIUM SIGNAGE SYSTEM

## DIVIDED DIRECTORY SIGNAGE

All of the signs in the Architech range have the ability to be divided into sections. Architech systems that curve around the 'y' axis can be divided horizontally and systems that curve around the 'x' axis can be divided vertically. This enables the media within individual sections of signs to be changed as and when required.

The dividers used in this system are 3mm self adhesive coloured strips that can be positioned where required.

Directory signage works in the same way as the rest of the system and can be used either internally or externally.
